

Meeting the Needs of Today and Tomorrow

South Hunsley is an outstanding school with a growing population within its catchment and is consistently one of the top performing schools in East Riding. It is the school's first priority to secure the very best education and outcomes for all our local children and to encourage students to have high aspirations and ambition.

Pride and a strong sense of community and identity

A new house system was introduced in April 2014 to ensure all our students continue to receive the best possible support in a growing school. We aim for all our students to access high quality pastoral support and feel part of a caring school community. Our students now feel proud to belong to their house and strive to do their best, not only for themselves but also for their fellow house members.

“The house system provides students with continued pastoral support from a dedicated Head of House and a House Leader who work with their house members from Year 7 to 11. Students have a strong sense of identity and are given many opportunities to take part in house competitions and events.”

Outstanding Together

WOLDS TSA
OUTSTANDING • TOGETHER

Last year, South Hunsley was awarded Teaching School status and has formed an innovative alliance of schools across the region to train and develop teachers and leaders in education.

“Wolds TSA has enabled me to experience teaching in different schools and has given me the individual support required to develop my own teaching style. The range of opportunities they have on offer is fantastic.”

Laura Holness, current trainee with Wolds TSA

A family of schools making a difference

Alongside Wolds TSA, The Education Alliance, originally the Hunsley Trust, has committed to creating a family of schools for the benefit of the children and the local community.

SOUTH HUNSLEY
Sixth Form College

The formation of the new alliance further strengthens two high achieving secondary schools and a fantastic primary school through sharing best practice to ensure people in our family of schools thrive and flourish.

“Malet Lambert is delighted to join The Education Alliance. It offers untold opportunities for all the schools to work together, while maintaining our individual identity”

Ann Barker, Trust Director

Investment in Science and Learning

Science is a hugely popular choice for students at South Hunsley, with 163 students opting for science subjects in the sixth form next year. We are delighted that so many students are being inspired to take up this discipline and develop careers in the scientific field.

The new science building, opening September 2016, includes five general use science labs, two chemistry specific labs for A Level use and two prep rooms. As part of the new building, two new history classrooms will also be created.

“The science classes here are really popular, so to have the extra facilities next year is a huge plus. My interest in science has continued to grow through my studies because the teachers continue to make it really interesting.”

Ammar Chaudhry, Year 13

“The new facilities will give students the opportunity to develop vital practical skills which they will need in their GCSE and A Level exams. Science is a very popular subject and we look forward to supporting our students to achieve excellent results and inspire them to seek scientific careers.”

Alison Fletcher, Director of Science

Technology and Product Design

After our new science building opens in September 2016, work will begin to refurbish the former Riding science classrooms to create four new specialist product design workshops. As demand increases for careers in technology and engineering, we are committed to providing the best possible facilities to our young people who will follow this route.

Today, Tomorrow and Beyond

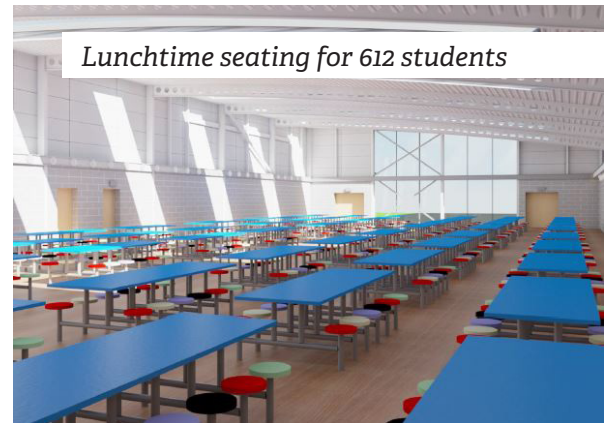

Flexible, multi use facilities

With an urgent need to create a large flexible multi use area, a new indoor facility will allow multi-functional use for exams, indoor sports and lunchtime dining facilities.

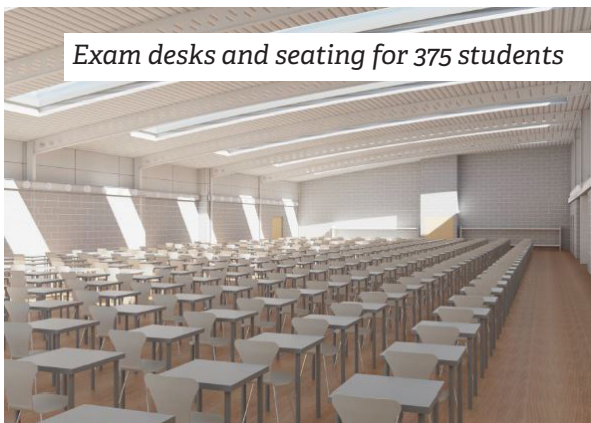

A new school kitchen will be incorporated into the design, allowing the school to continue to provide meals and snacks for all students. The area will provide seating for over 600 students at any one time, allowing students to access meals in a timely manner and socialise at lunchtime.

The area will enable exam desks to be set out to seat 375 students, allowing a controlled and contained examination area to be created for use throughout the exam season.

The sports facilities will be available for community use out of school hours for various sports including tennis, netball and five-a-side football. The 3G pitch, football pitches and current sports hall will also continue to be bookable by the community.

Employer Led Programme

South Hunsley has launched a unique programme of study, combining employability skills with traditional A Levels. Over 60 employers, such as Siemens, NHS and Aunt Bessies, are signed up to the programme and will support students in preparing for some of the most competitive careers. After a challenging interview process, there are 40 students currently signed up to the programme who will complete an internship in July 2016.

“The demand and the passion from the students to learn is there - it is now up to businesses to get involved and make a difference.”
